

Historical quotes

Historical quotes

GET <https://data.alpaca.markets/v1beta3/crypto/{loc}/quotes>

The crypto quotes API provides historical quote data for a list of crypto symbols between the specified dates.

PATH PARAMS

loc string **required**
Crypto location.

us

QUERY PARAMS

| | |
|---|----------------------|
| symbols string required A comma-separated list of crypto symbols. | BTC/USD,LTC/USD |
| start date-time The inclusive start of the interval. Format: RFC-3339 or YYYY-MM-DD. Default: the beginning of the current day. | 2024-01-03T00:00:00Z |
| end date-time The inclusive end of the interval. Format: RFC-3339 or YYYY-MM-DD. Default: the current time. | 2024-01-04T00:00:00Z |
| limit integer 1 to 10000 Defaults to 1000 The maximum number of data points to return in the response page. The API may return less, even if there are more available data points in the requested interval. Always check the <code>next_page_token</code> for more pages. The limit applies to the total number of data points, not per symbol! | 1000 |
| page_token string The pagination token from which to continue. The value to pass here is returned in specific requests when more data is available, usually because of a response result limit. | |
| sort string Defaults to asc Sort data in ascending or descending order. | asc |
